## **Hydrate 4 Health Challenge!** *Look great, feel great, hydrate.*

### **Re-scan weekly to visually track your results!**

Get a gallon container (so you have a visual reference). Fill it up in the AM, ideally with living water (intracellular hydration) for best results or natural spring water. Drink as much as you can all day and do your best to finish the container before bedtime.

Measure what you drink. Drink that amount or more each day for 7 days and monitor how you feel. **Note: The more you urinate, the more fat, cellular waste and toxins you flush!**  
**Your report identifies your individual recommended water pH setting.**

Drink when your thirsty, is the old way of thinking about hydration. We encourage you to mindfully drink more water on purpose, with a purpose. Hydrate for health, to flush fat, cellular waste and toxins daily, while providing your body the resources to maximize physical and mental performance.

*Join Our Mission of Health,  
Hope and Financial  
Prosperity!*

***Would You Like To Earn Extra Money?***

If you're into health and helping others, you're invited to partner with the pros at Vollara. We train and offer a simple, effective, work for yourself program. You can earn great money, on a part time basis, providing Free health screenings and offering healthy savings on best in class solutions.

Get in touch with the Associate who performed your scan for more information.
